

SolarAir Energy

CAPABILITY STATEMENT

Next Generation Solutions

Solar Air Energy was founded in 2019 and has quickly become one of Australia's leading renewable energy companies.

We are innovative and reliable with a high level of technical experience. Our experience includes; electrical construction, air conditioning and refrigeration services, renewable energy and solar batteries.

Proudly Australian

SIGNIFICANT GROWTH IN EVERY ASPECT

Solar Air Energy holds all licenses in every field of work, including; Electrical, Refrigeration, Solar, Batteries, Data, Security and CCTV.

It's easy to see why we have quadrupled in size in the past three years. We now have four times the number of vehicles and teams on QLD roads servicing all of Queensland and parts of N.S.W.

We have installed hundreds of commercial solar systems and thousands of residential solar systems

in our short history. As we move towards batteries, a more sustainable future looks promising.

Our first class reputation has allowed strategic partnerships in manufacturing and supply.

Solar Air Energy has achieved its rapid growth through customer focus and reliability. We believe the job is not complete until all our valued customers are happy with our work, which shows through our honest and positive customer reviews.

"It's easy to see why homes and businesses are now choosing to install with Solar Air Energy."

About Us

FIRST-CLASS SERVICE WITHOUT COMPROMISE.

This starts with expert project management, processes, and strategic implementation of a fundamental understanding of the current legislation and regulations in the Australian electrical industry.

In addition, we are constantly reviewing and undertaking regular training and assessments

through external auditing firms to ensure all work is conducted correctly.

Safety is no compromise to family's homes or businesses, enabling peace of mind that Solar Air Energy provides the highest level of quality in the industry now and into the future.

Achievements

RELENTLESS IN THE PURSUIT OF EXCELLENCE

*At Solar Air Energy, we are
relentless in our pursuit of excellence!*

We constantly push ourselves as a team to surpass our own accomplishments, consistently exceeding expectations.

Our unwavering determination and drive enable us to emerge as leaders in the industry, as we continuously deliver exceptional work. Our success is a testament to our hard work and unwavering commitment to excellence.

Our Services

OUR OFFERINGS

Solar

- **Clean Energy Council Approved** Installers & Designers with Battery accreditations
- Commercial installations up to and over 150kW and residential solar system sizing
- Geographical coverage across Queensland and New South Wales

Air-Conditioning

- **Dual trade qualifications** in air conditioning and electrical yield higher technical knowledge
- Extensive experience in commercial air conditioning and refrigeration across sectors
- Service and maintenance enhance ventilation, promoting health and safety via air purification

Electrical

- **Qualified Master Electricians** with 25+ Years experience across a diverse range of all electrical components in the industry
- All Commercial, Residential, Industrial & Mining
- Physically fit team with a strong work ethic to produce quality outcomes on time, every time

Greener Futures

WHAT OUR CUSTOMERS ARE TO EXPECT

Solar Air Energy is committed to sustainable futures by ensuring our outcomes are maintaining clean energy production. We are implementing new and improved technologies within the Australian market to aid in a net-zero prospective for Australian communities.

To effectively lower emissions to transition toward a zero-emission future, our professionals at Solar Air Energy seek to provide the best

electrical-powered fleets. Such innovative solutions include solar-powered public transport for coaches, charter, and school buses.

The Guarantee;

- Fewer CO² emissions
- Boosting the local economy
- Better working conditions
- Ease of production control
- Fast delivery

Greener Futures

ELECTRICAL VEHICLE CHARGERS

At Solar Air Energy, we intend to maximize electrical vehicle capabilities.

We understand the burden of electrical vehicle owners needing to travel long distances to charge their vehicles. Our incentive is to effectively commercialise domestic electric vehicle charging stations to promote accessibility and sustainability to all vehicle users.

Our accreditation and certification with Tesla enable us to install such technologies as leading industry professionals - qualifying our business to aid the transition to net-zero emissions with ease and innovation.

Testimonials

WHAT OUR CUSTOMERS HAVE TO SAY

“

Nathan & his team did an amazing job, communication was clear & efficient. We had our solar installed within a week of confirmation.

Definitely recommend Solar Air Energy to anyone looking to have solar installed on their property.

Sarah Maloney

“

Anthony, Nathan and the whole team are amazing, professional and responsive. Was really happy I went with them, they were always available to answer my questions - *Extremely pleased with how it all turned out.*

Chris Ormiston

“

The guys were so patient and took their time to take us through the Solar App when they had finished the install. *My Grandma always remind me how happy she is with her solar when I visit!*

Anna

Testimonials

WHAT OUR CUSTOMERS HAVE TO SAY

“

Upon realisation of the imminent increase in energy prices, I went out to market for quotations to procure a new hybrid PV system to replace our 3KW system - which was outside warranty and no longer was supported by the manufacturer or installation company.

After requesting proposals from 6 different companies, I was confronted with many options. From the massively 'over-engineered,' to the 'we will beat any price' were downright ridiculous (in terms of PV to available space).

As an electrician and project manager, I was able to navigate this quite smoothly. But, I can see how it could become overwhelming for somebody without the industry knowledge.

"I can't recommend the team at Solar Air Energy enough and will be returning to them down the track for installation of battery storage."

From the initial site visit and consultation with Anthony Briggs (Sales Engineer), I knew that they were the right choice to provide the correct solution for our energy utilization.

Anthony was able to articulate the rules and regulations that governs the PV installation. He further explained how and why other companies' proposals did not meet these standards.

From their installation team; Jack, Jack and Nathan carried out an initial pre-start prior to installation and guided me through each milestone to ensure we were all aligned prior to the installation. They completed the job promptly and without any variations.

Thanks team!

Jordan Walker

Our Experience

COMMERCIAL

HAYMANS - ELECTRICAL & DATA SUPPLIES

“

Nathan and his team at Solar Air Energy were outstanding! Their quote came back with all the information we needed to make the right decision for our business.

Once we accepted the quote, the Solar Air team provided a date of installation, a delivery schedule for the equipment and time frame for the installation, which was met.

“Nathan and his team at Solar Air Energy were outstanding!”

Their team arrived on time, setup an appropriate traffic management plan so

we could continue trading and installed the entire 96 panel system in one day.

We have been very happy with our new system, it's neat, looks good, performs well and we can check our app to see daily power generation, etc.

Nathan has been very helpful answering any questions we've had since installation. Very Professional.
